LOADING INSTRUCTIONS:

Commodore 64: To load Institute on the Commodore 64 diskette, place the disk with the Commodore 64 label (blue) facing up in your 1541 disk drive. Turn on the computer, and when READY appears on the screen, type the following: LOAD "LOADER",8 (Press RETURN key). After a few seconds, READY will appear again. Type: RUN (RETURN). The program will take 3-4 minutes to load. Title screens will be drawn, and you will be instructed on how to begin the game.

Atari: To load Institute from disk on the Atari, turn on the first disk drive and insert the disk, Atari label (purple) facing up. Turn on the computer. The disk will load and show several title screens. You will then be instructed to turn the disk over and hit any key to begin playing The Institute. On Atari 800 XL computers, hold down the OPTION key while turning on the computer, and hold it for about ten seconds while the disk boots.

Apple: To load Institute from disk on the Apple, turn on the first disk drive and insert the disk, Apple label (red) facing up. Turn on the computer. The disk will load, and run automatically.

SAVING AND LOADING GAMES:

To save a game in progress, type the command SAVE GAME. On the Apple, the game in progress will be saved automatically, erasing the previous game on the disk. On Atari and Commodore computers, you will see a menu for saving 4 games. To save, designate a number (1-4) where you want to save, and a name to remind yourself of what you saved. When saving is complete, you will be returned to the game where you left off. Atari versions have four game areas on each side of the disk, so remember which side you saved on!

To load a saved game back in, boot up the program as described above. When you reach the first room of the Institute, type the command LOAD GAME and select the game you wish to play.

The Institute is a graphic adventure game. In addition to the verbal description of each location, you will often see pictures of the locations and characters. There are over 60 locations available in The Institute. You move from place to place by typing the first letter of the direction in which you wish to travel. Possible directions are North (N), East (E), South (S), West (W), and combinations such as North East (NE). You can also, in some locations, move by commands like CLIMB.

The commands TALK and LISTEN are very useful in communicating with the characters you encounter in The Institute, and you should try them repeatedly. LOOK at anything and everything to gain valuable clues. In rooms, it is a good idea to proceed as if you are physically in that location. For example, if a room description reads:

You are in a large office.

A desk and a window are here.

You should try things like:

LOOK

LOOK AT DESK

OPEN THE WINDOW

LOOK UNDER THE DESK

MOVE THE DESK

LOOK OUT THE WINDOW

CLIMB OUT THE WINDOW

When you look at the desk, the game might respond:

It has a drawer.

You could then type:

OPEN THE DRAWER

The game might then respond:

A gold key is here.

You would then notice that the item GOLD KEY has been added to the list of VISIBLE ITEMS at the top of the description screen. You can pick up and take with you any item which appears in the VISIBLE ITEMS list. Type GET GOLD KEY and it will be added to your inventory. A list of your inventory is always displayed on the text screen. It can only hold six items, so you may need to drop one item in order to carry another. To drop an item, type DROP and the full name of the item. It will remain in the place where you dropped it. Making maps and noting where objects are will enable you to find the objects later if you need them.

The Institute has a large vocabulary, so experiment to find appropriate words. Some useful words are:

READ

EAT

CLIMB

OPEN

KILL

UNLOCK

MOVE

TURN

TASTE

PUSH

THROW

ATTACK

At any time during the game, you can type the command GRAPHIC. This will turn off the pictures and greatly speed up the game. To restore the pictures, just type GRAPHIC again. You can also SAVE the game at any time (see instructions above).
